We have had the pleasure of working with Lisa Hammer for over a decade both locally and in the Caribbean. Her knowledge and expertise has had a measurable benefit to the overall beauty of the landscape. In particular her expertise while consulting for the excluisve Cap Juluca resort in Anguilla considerably reduced maintenance and pest management costs while providing an environmentally sensitive approach. Her knowledge could be easily seen in the enhanced beauty of the landscape once she became involved.

I would highly recommend Lisa.
